

Poly Sync 60 Microsoft Teams Certified Speakerphone (77P41AA)

Premium, powerful sound

Everyone deserves to hear the whole meeting — loud and clear. This smart speakerphone fills conference rooms with remarkable sound using powerful twin speakers. And be heard with six mics focusing on voices, not the noise.

Big sound, meet smart ideas

Get down to business and hear voices clearly with the smart speakerphone designed for conference rooms with Poly signature audio. Twin speakers and the six-mic array ensure everyone has a voice while helping to keep echo and noise out.

Let's get started

Users enjoy easy connectivity with their preferred way to work — connect wirelessly via Bluetooth® or wired via combined USB-A/USB Type-C®. And with a built-in USB video camera input moving from an audio to video call is super easy.[1]

Featuring

Six-microphone array

Experience conference calls with outside noise and distractions tuned out. A six-microphone array focuses on your voice — not the surrounding noise.

Full-duplex audio

Collaboration gets tough when one voice dominates the conversation. Full-duplex audio makes simultaneous conversations a breeze.

Audio clarity

Enjoy more clarity on every call thanks to the bass reflex system with dual passive radiators for natural voice and deep bass.

Consistent voice level

Being on the far end of the call becomes difficult in a conference call with various speakers. Poly Sync 60 features adaptive gain control for consistent voice level even if the speaker stands far from the unit.

Simple for IT

Just deploy and you're done — no new interface to learn — teams use their own devices, and work in the collaboration tools they're comfortable with. For IT, inventory tracking and updates are made easy with Poly Lens remote device management.
