

4-Port KM Switch with Mouse Roaming, USB Switch for Keyboard/Mouse, 3.5mm/USB Audio, Peripheral Sharing for 4 Computers, TAA Compliant

Product ID: P4A20132-KM-SWITCH

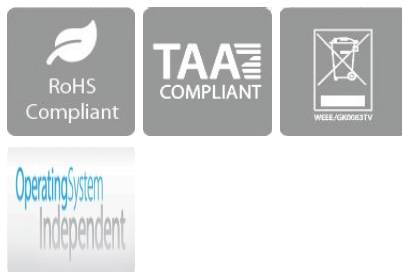

This Keyboard and Mouse (KM) Switch enables switching a single keyboard and mouse between multiple computers using mouse roaming, allowing users to seamlessly move the cursor across multiple screens (i.e., one monitor per computer).

Switch between computers by moving the mouse between monitors, without the need for hotkeys or physical buttons, enabling uninterrupted workflow and increased efficiency. Hotkey and push-button switching are universally compatible. Mouse Roaming is supported by most major desktop operating systems, including Windows, macOS, and Linux.

To accommodate various physical monitor setups, there are six preset display configurations available. This allows for smooth mouse movement across host monitors.

Hotkeys enable listening to audio from one computer while controlling another. USB audio and 3.5mm pass-through are available, and LEDs provide visual port selection status, while an audible buzzer confirms hotkey selection.

Certifications, Reports and Compatibility

Applications

- Manage multiple computers simultaneously, such as in data centers, server rooms, or network operations centers
- Navigate between platforms and workstations, increasing productivity and responsiveness

Features

- **MOUSE ROAMING:** Instantly switch computers by moving the mouse between monitors, without the need for hotkeys or physical buttons, enabling uninterrupted workflow and increased efficiency; Hotkey and push-button switching options are also available
- **SCREEN LAYOUT PRESETS:** Monitor layouts controlled via hotkeys are designed to accommodate a variety of physical monitor setups, allowing for seamless mouse movement across host monitors; 6 different preset display configurations available
- **USB CONNECTIVITY:** Supports up to three USB Human Interface Device (HID) peripherals and two USB 3.2 Gen 1 (5Gbps) devices; Ideal for environments such as control rooms, security facilities, server rooms, and financial operations
- **THOUGHTFUL DESIGN:** Independent audio switching allows users to listen to audio from one computer while controlling another; USB audio and 3.5mm pass-through available; LEDs provide visual port selection status; Audible buzzer for hotkey confirmation
- **UNIVERSAL COMPATIBILITY:** Mouse Roaming is supported by most major desktop operating systems including Windows, macOS, and Linux; Hotkey and push-button switching are OS independent; Works with all hardware platforms including Intel and AMD
