NEW PLINTH

In order to mount Apple iPads or other tablet based payment devices, it has been necessary to add these features to the plinth in order to provide sufficient stability and security.

1: New positioning slots for tablet devices

2: New dowel holes for tablet device stability

In order to maintain high security but at the same time offer accessibility to cardholders with disabilities, we have added a secure Kensington tether anchor point to the plinth. Two strengthening fins have also been added to ensure that the anchor point cannot be compromised.

1: Kensington tether anchor point

2: Strengthening fins

1: Brass inlaid screw holes (reserved for future use)
